Migration from IPv4 to IPv6: Principle, Techniques & Tools

Mr Ramzi BOUZOUBIA – CISCO Instructor &
Consultant at ITM Studya

14H30-16H00

Room 26

Description

This workshop will discuss some techniques for migration from Ipv4 to IPv6. It starts by a description of IPv4 limits followed by a presentation of the IPv6 technology. The migrations techniques consist of:

- Double pile
- Tunneling
- Nat 64

At the end of the Worshop, participants will practice these techniques using Paket-Tracer Tool.

//

Prerequisites

- Students of all levels can participate.

//
